Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The frame house is a two-story frame structure constructed in a rectangular plan with a one-story rear section. It has a three-bay by one-bay main section with a one-bay addition. The main facade is symmetrically arranged with a central entrance and a three-bay, one-story porch. The exterior is covered in asphalt shingles in a diamond-shape pattern. The structure appears to date from the mid-19th century.

The property is located on the north side of Sandy Hook Road, approximately .07 mile east of Clark Road, in Sandy Hook. The house sits close to the road. The main facade faces south.

The two-story structure is constructed of frame covered in a diamond-shaped asphalt shingle. The structure is built on a fieldstone foundation. The main facade is symmetrically arranged with a central entrance and two-over-two sash windows in the outer bays of the first story, the three bays of the second story and the single bays on both stories of the gable ends. The three-bay, one-story porch is constructed of modern materials and has a hipped roof with aluminum supports. The section under the porch is covered in German siding instead of the asphalt shingles, revealing the original exterior siding that was on the house. The corners of the house have white painted corner boards. The gable roof has a boxed cornice and is covered in sheet metal. There is an interior-end brick chimney on the east gable end. The one-story addition runs the full-length of the house. It has a two-section window on the east and west facades. At the rear of the addition is an interior-end brick chimney stack.

8. Significance

Survey No. WA-III-084

Period	Areas of Significance—Check and justify below			
<input type="checkbox"/> prehistoric	<input type="checkbox"/> archeology-prehistoric	<input type="checkbox"/> community planning	<input type="checkbox"/> landscape architecture	<input type="checkbox"/> religion
